Hello All,

I've taken and passed two MCSE 2003 exams to date: 70-270 (XP) and 70-228 (SQL - elective). I'm going to take another exam coming up in June, but am unsure which one I should do?

CORE:

70-290

70-291

70-293

70-294

DESIGN:

70-297 or 70-298

I have the MS books and plan on setting up a lab at home to practice with. May/June are going to be busy months for me however (getting married, moving, etc.), so I won't have as much time as I'd like to study and practice for this. SO, I'd like to take whichever test is considered easiest of this group so I can pass this by end of June. Any thoughts or ideas you may all have will be greatly appreciated!

Herb

.
