In article <#QFyWw6WFHA.1508@xxxxxxxxxxxxxxxxxxxxxxxx>, youcant@xxxxxxxxxxxxxxxx says...

> I'm going to snap. I share an office with my boss and another employee, who
> is technically part of the IT department, but doesn't know the difference
> between CMYK (or RGB) images and the folder she is supposed to put them in
> (which is named CMYKPic [or RGBPic]). She can't grasp the fact that the
> folder was named after the format, and other than that, they're not related
> at all. Putting an image in the CMYKPic folder does not make it a CMYK
> image. But this is not what prompted me to write this, so I digress.
> What really eats at me is my boss doesn't understand what the hell a print
> queue is. If she or "the other one" is printing something to the deskjet in
> our office, the one who is not printing will ask "is it alright to print
> something real quick?" MORANS! Just frickin send whatever it is you're
> trying to print. It will print, trust me. Maybe not right this second, but
> it will print. I've told them this, but they don't get it. And no, neither
> one of them really prints anything so sensitive that it has to be printed
> immediately, or so urgent that it would require the other to stop printing.
>

That is pretty funny.

Tell them that you read on teh HP web site that if two people print at the same time, there is a reasonable chance the printer will catch on fire, so it is good that they are so carfeul.

Here is some photographic "proof"

<http://members.shaw.ca/kaz2/printer/>
