You can view all Microsoft Certifications at
<http://www.microsoft.com/learning/mcp/certifications.asp>
>From this location you will get the necessary information
you need to plan and do your training.

What ever else you do, I encourage you to use Microsoft's
Press training material. After all this is their product,
who better to supply training material? You can view
Microsoft Press books at
<http://www.microsoft.com/learning/books/product.asp> Most
microsoft press books can be acquired for less at
<http://www.ebay.com> or any other auction site.

Additional info you will find invaluable – FYI

VERY IMPORTANT: Free mini certification tests.

Microsoft Skills Assessments are free and Important to
you. These assessments are maintained by Microsoft to
insure they are current with todays technologies. Industry
use these assessments to measure your skill sets, so
completing them successfully is in your best interest.
Certified Professionals are also being asked by industry
to complete these assessments to verify their credentials
are current. You can find these assessments at
<http://www.microsoft.com/learning/assessment/default.asp>

These assessments are like mini certification tests. You
can take as many assessments as you need or want to and
there is no cost. If you need help, you can also get
excellent free detailed Q&A support for these assessments
at <http://disnetinc.com/>

Remember, if it is necessary to retake a certification
exam you can "Get a Free second shot" at
<http://www.microsoft.com/learning/mcp/offers/2ndshot/> DO
not take more than one exam on the same day. This is a

new face

recipe for failure. The sequence you take exams in is not important. Set the sequence that is best for you. It will benefit you to lightly peruse all manuals you may have related to your certification efforts to get the bigger picture but when you are preparing for an exam focus on material specific to the exam.

You can View New and Upcoming Exams at
<http://www.microsoft.com/learning/mcpexams/status/new.asp>

You can find Simulations in MCP exams at
<http://www.microsoft.com/learning/mcpexams/simulations/>

Stay ahead of the curve. As Microsoft says "The one thing you can count on in the IT field is change. Whether it's for a new job or a system-wide deployment, keeping your skills current is the best way to enjoy continued success." I encourage you to take the currently available exams as their individual going forward usefulness will carry you for the next few years.

You can find code samples at
<http://msdn.microsoft.com/vbasic/downloads/samples/default.aspx> and <http://gotdotnet.com/community/usersamples/>

Good Luck
