Hi All

<http://www.ibprovider.com/eng/news.html>

Latest updates

– Internal modifications.

Review of changes in version 2.4

– Bugfixes.

– There is the new registry code of the produce in the system.

Now you have a possibility to change CLSID provider components and to change registry rules.

The identifiers of components are in "PROG_REG_PARAMS".

The registry rules are in "PROG_REG" resource.

– Two modes of memory allocation for result rowsets:
through using old method (HeapAlloc/HeapFree) and
through new one (VirtualAlloc/VirtualFree and SEH).

– Changes in C++ library
