I don't know about Delphi or it's redistributable requirements but as for ADO and JET, you will need to make sure MDAC 27 or above and the MS Access (JET) dependencies are installed. You can obtain the latest JET service pack from

<http://www.microsoft.com/downloads/results.aspx?productID=&freetext=JET&DisplayLang=en>

and the latest version of MDAC (MDAC 28 SP1) from

<http://msdn.microsoft.com/data/mdac/downloads/default.aspx>.
