I am still hoping there is a better way, but I was able to set it, as long as I add the columns to the DataTable before calling the adapter.Fill() method.

```
....  
DataTable dt = new DataTable("TryIt");  
dt.Columns.Add("utc", typeof(DateTime));  
dt.Columns["utc"].DateTimeMode = DataSetDateTime.Utc;  
dt.Columns.Add("local", typeof(DateTime));  
dt.Columns["local"].DateTimeMode = DataSetDateTime.Local;  
adapter.Fill(dt);  
....  
.  
.
```
