What is the syntax of passing parameter to oracle from VB-6 Data Environment Designer.

I tried following:

Select * from mytable where InvNo=mInvNo <----- this works only with Microsoft Access but not with oracle and sql server

I also tried putting @ before parameter name but could not succeed.

Select * from mytable where InvNo=@mInvNo

The parameter name is not listing in Data Environment Parameter Tab.

Any idea please ?

Best Regards,

Luqman
