You're using Interop to run the old COM object.

Oh, OK, I'm a new programmer... didn't know what Interop was about. Once I can afford a new computer and VS 2005, I'll probably move over to SQL Express. Yes, I'm using ADO.Net code to run sql statements, but needed to update the database via code (so people don't have to send me the db file). If only .NET SQL gave me ALLOW ZERO LENGTH for Jet :o(

You will find that that property does not exist for SQL Server, so you won't have to worry about it.
