1. the link install Jet for Windows 2003 Server 64bits, and I am using Windows Vista 64 bits, thus the program actually won't install on Vista -> error message incompatible system

2. I saw on msdn forum a lot of articles indicating that there is actually no version of Jet for Vista 64 bits and that MS won't release a 64 bit version of Jet, so I need to connect to MS Access DB with an other provider.

Not use Jet ... ??? It's a Jet database. What else would you use?

BaCAD wrote:

Yes, I forgot to mention, that I don't want to use Jet !
Any other suggestions ?
thx

hello

I need to know which ADO provider I can use to connect to MS Access Database under Windows Vista 64 bits.
