Baroc (Baroc@xxxxxxxxxxxxxxxxxxxxxxxxxxxxxx) writes:

In a perfectly working application, i have a situation on one computer (windows xp – sp2).

At one location where i create a datatable based on a query:
SELECT * from table where Field Like 'a%'
fails. The error is "Internal ole automation error"

Out of 15 computers and different OS i tried, this one machine is the only one where i get this error.

Not that it is likely that I know the answer, but couldn't you at least tell what database you are using? Oracle? Access? SQL Server? And more exactly how is your call packaged? ADO? OleDb Client? OleDb Consumer Templates?
