I am experiencing a weird problem with MDAC on a Windows XP SP2 machine. I am using ADO and the following connection string,

```
"Provider=Microsoft.Jet.OLEDB.4.0;User ID=Admin;Password=;Data Source=C:\Test.mdb;"
```

It keeps giving me this error message:

```
"Run-time error '3706"  
"Provider cannot be found. It may not be properly installed."
```

I tried reinstalling MDAC 2.8 and it does not work, any idea?

thanks!

.
