Hello,

i would like to create a crosstab view within vb.net 2005 per sql-syntax.
Can someone help me with the right syntax?

here is how i tried it (didn't work):

```
Dim mySQL As String
```

```
mySQL = "CREATE VIEW a_w_tmp_ReportVertrag_Kreuz AS " & _
```

```
"TRANSFORM Sum(a_w_tmp_reportVertrag_Gruppiert.ZahlGesamt) AS [Summe von  
ZahlGesamt] " & _
```

```
"Select Case a_w_tmp_reportVertrag_Gruppiert.Gruppe2 " & _
```

```
"FROM(a_w_tmp_reportVertrag_Gruppiert) " & _
```

```
"GROUP BY a_w_tmp_reportVertrag_Gruppiert.Gruppe2 " & _
```

```
"PIVOT a_w_tmp_reportVertrag_Gruppiert.Gruppe1"
```

```
Dim myCmd As OleDbCommand
```

```
myCmd = New OleDbCommand(mySQL, Me.Connection, myTransaction)
```

```
Try
```

```
myCmd.ExecuteNonQuery()
```

```
Catch ex As Exception
```

```
MsgBox(ex.Message, MsgBoxStyle.Information, "Datenbank Update")
```

```
Return False
```

```
End Try
```

```
Thanks in advance
```

create view crosstab per sql-syntax
