I know windows xp sp2 has bug that limits speed to 100Mb/s on 1394b port, and microsfot issues a patch KB885222 to solve this problem. Could anyone tell me whether windows xp sp3 has sovled that problem? I tested a firewire 800Mb/s digital camera, It can not run on 800Mb/s, from the output message, the speed is S100, but I change registry value of SidSpeed to 3, the speed can reach to 400Mb/s. any helps would be appreciated.
