Hi all.

I want simulate the "OSR USB FX2 Kit" and I think Microsoft can help me in it.

My team will develop a system using C# in .NET 2.0 or 3.5 Framework.

My OS is Windows Vista 32bits SP 1 and I have Visual Studio 2005 and 2008 Trial.

The final USB hardware was not finished and while it, we will make same tests.

- Where can I get "OSR USB FX2" SIMULATOR ?
- Where can I get C# Samples to communicate with this simulator?

Thanks a lot and congratulations for your work !

Regards,
André.
