Dear friends,

Recently I have formatted my machine and then installed Microsoft Windows XP Professional with SP2.

After logged into my account in LAN and when I double clicked over the "LAN Status Icon",I get the error message
"Some of the controls on this property sheet are disabled because you do not have sufficient priveledge to access or change them".

The above error occurs only after the format.I am sure I am having sufficient priviledge.

Please help me.

Regards,
Thirumalai.
