I was trying to compile the sample AutoConfig of Windows SDK for Vista. I have a Windows Vista system(X86) with Visual Studio 2005 and Windows SDK for Vista installed. It seems enough to compile the sample. But I have received a lot of mistakes. Can anyone help?

The error messages are such as:

```
i:\microsoft sdk\windows\v6.0\include\l2cmn.h(86) : error C2061: syntax
error : identifier 'dwDataSize'
i:\microsoft sdk\windows\v6.0\include\l2cmn.h(86) : error C2146: syntax
error : missing ';' before identifier 'PVOID'
i:\microsoft sdk\windows\v6.0\include\ifdef.h(153) : error C2146: syntax
error : missing ';' before identifier 'NET_IFTYPE'
i:\microsoft sdk\windows\v6.0\include\ifdef.h(153) : fatal error C1004:
unexpected end of file found
```

Do I missed something needed to install?

Thank you  
Frank
