- 

There are several ways on how to do this.

- stop 'Server' service (a rude way)
- enum all bindings (via INetCfgBindingPath) and disable them (see solution provided at OSR: <http://www.osronline.com/showThread.cfm?link=8331> )
- use NetShareEnum + NetShareDel

how can i programmatically (C++) enable /disable "File and printer sharing for Microsoft Networks" ??

Is here any solution working under XP and Vista ??
