Goodday,

at the moment I'm experimenting with MOM.
I would like to set a query on a file which checks if the
'LastModified'-date is less than the current date (so the LastModified
date must be yesterday, i.e.)

The query would be something like:
if TargetInstance.LastModified < currentDate

At this moment, I have the following query:

```
select * from __InstanceCreationEvent WITHIN 60 WHERE  
TargetInstance ISA 'CIM_DataFile' AND TargetInstance.Name =  
'c:\\file1.txt' and TargetInstance.LastModified < ???
```

Can somebody help me completing this script? I'm completely new to
this, and I've searched for a couple of hours but I can't find the
solution.

The script should only check on date (not on time).

Thank you very much

Cis
