Hello Jose,

it was a pleasure for me.

Manfred

Oh !!! Thats work !!  
Thanks very much.

Manfred Senn ha escrito:

Try:

```
' Obtiene la clase Win32_Process  
Set objProceso = objWMIServicio.Get("Win32_Process")  
iProcessId = CInt(objProceso.Create(strPrograma))
```

Hi, I have the next code, and when I try to run get this error:

```
Error de Microsoft VBScript en tiempo de ejecución:  
El objeto no acepta esta propiedad o método:  
'Methods_...'.InParameters.SpawnInstance_objProgram'
```

What's the problem? Can't I run a remote process??

```
Const WbemAuthenticationLevelPktPrivacy = 6  
strUsuario= "SRV1\administrador"  
strPass= "password"  
strPrograma = "notepad.exe"  
strComputer = "SRV1"
```

## Re: Error running remote process with WMI

' Conexión a WMI

```
Set objWbemLocator = CreateObject("WbemScripting.SWbemLocator")
```

```
Set objWMIServicio = objwbemLocator.ConnectServer (strComputer,
```

```
"root\cimv2", strUsuario, strPass)
```

```
objWMIServicio.Security_.authenticationLevel =
```

```
WbemAuthenticationLevelPktPrivacy
```

' Obtiene la clase Win32\_Process

```
Set objProceso = objWMIServicio.Get("Win32_Process")
```

```
Set objPrograma =
```

```
objProceso.Methods_("Create").InParameters.SpawnInstance_objProgram.CommandLine
```

```
= strPrograma
```

'Ejecuta el programa.

```
'Set strShell = objWMIServicio.ExecMethod("Win32_Process", "Create",
```

```
objPrograma)
```
