Hello!

You wrote on Mon, 27 Sep 2004 04:39:01 -0700:

- G> Does anyone know how to connect .net with java class and get some values
- G> back to .net??
- G> The scenario is this
- G> The .Net application that I have to write should invoke java class that
- G> inturn gets information abt the user that is listed in oracle internet
- G> directory and gets back the result to .net application
- G> anyone knows about that??

What channels of data excahnge do you consider using? If sockets, then you can use MsgConnect (<http://www.msgconnect.com/>).

With best regards,
Eugene Mayevski
