You might want to post to microsoft.public.pocketpc.activesync instead.

I have the Money 2005 Premium Application installed in my laptop, and some months ago I bought an iPaq Pocket PC with Windows Mobile 5.0 on it.

The synchronization is working, but when I install the Money for the Pocket PC 2005 and the synchronization starts then it never finishes.

Does anyone know how to solve this problem?

Thank you.
