- ✘ I have a schema that defines some tables.
- ✘
- ✘ Table1 say, has columns A, B, C, D and E
- ✘
- ✘ I would expect that when I create Table1 that the columns would be in
- ✘ the order specified i.e A,B,C,D,E.
- ✘
- ✘ However, for some reason that I cannot see the columns appear mixed up.
- ✘ When I place a breakpoint and examine the ColumnFromName collection
- ✘ which is a property of the Columns property of the Table they are in a
- ✘ different order.
- ✘
- ✘ Can anyone explain why this is so?
- ✘
- ✘ The tables are populated from CSV files produced by an ECR and so I'm
- ✘ relying on the column order.
- ✘
- ✘ Does anyone know why this happens or how I can ensure the table is
- ✘ created with columns in the same order as they are defined in the
- ✘ schema?
- ✘

I don't recall ever seeing this happen with a CSV file. Do you have some code you can post and a few sample lines of the CSV file?
