Mark,

I have tested it and probably the same problem as you. I have placed your question completely documented in another place as question and saved your message. I hope that I can answer you soon.

If Mary will investigate it, I made this test

```
\\
Dim dt As New DataTable
dt.Columns.Add("mystring", GetType(System.String))
dt.Columns.Add("myDate", GetType(System.TimeSpan), _
"Convert(mystring, 'System.TimeSpan')")
dt.LoadDataRow(New Object() {"00:01:00"}, True)
```

Error above, it is telling me that the conversion does not go
///

Cor

.
