Actually, I'm done.

Me too, afaik i already mentioned the ORDER was the issue, yes the field exists, yes the query works in access development, asking more is time consuming unless you are willing to run the silly app and see for yourself.

No, my questions are NOT answered.

Once again (3rd time?) WHERE does it break? Do other Views work ok??

I'm not gonna install this app just to help you. You want help, then answer my questions

Actually, I'm done.

[news:e556a4\\$n0l\\$1@xxxxxxxxxxxxxxxxxxxxxx](mailto:news:e556a4$n0l$1@xxxxxxxxxxxxxxxxxxxxxx)

Why didn't you try the example?  
All your questions would then be answered and you'll see  
this is a weird  
thing ok?

Re: CREATE VIEW error

So exactly where does it break?? If you remove the Order by? Can you order by on other fields? Is Field3 really your field name? Not very descriptive.

```
CREATE VIEW RESULT
```

```
AS
```

```
SELECT *
```

```
FROM Table1
```

```
ORDER BY Field3;
```

Same result (error)

I have not,  
will try  
tomorrow  
(Holland :) )  
I'm using  
year and  
such in  
expressions,  
these go  
well though.

I  
assume  
you've  
tried  
other  
ORDER  
BY  
clauses

Re: CREATE VIEW error

that  
work  
ok?  
I  
believe  
YEAR  
is  
a  
built-in  
Access  
function  
that  
you  
can't  
use.  
Did  
you  
try  
ORDER  
BY  
Field3?

OK  
Jeff,  
i  
worked  
it  
out,  
at  
the  
end  
it  
was  
easy  
to  
prepare  
an  
example.

Just  
create  
a

Re: CREATE VIEW error

table  
with  
a  
few  
fields  
+  
datefield  
(whatever).  
When  
i  
add  
the  
ORDER  
BY  
clause  
it  
will  
not  
accept  
it..

```
CREATE  
VIEW  
RESULT  
AS  
SELECT  
*  
FROM  
Table1  
ORDER  
BY  
Year(Field3);
```

I  
have  
posted  
the  
working  
example  
here:  
<http://www.hellobasic.com/trials/dbtest1.zip>

I'm  
sure  
there  
are  
workarounds  
for  
this  
by  
making

Re: CREATE VIEW error

use  
of  
additional  
querydefs  
but  
that's  
not  
really  
a  
goal  
is  
it?  
ACCESS  
runs  
the  
select  
statement  
fine!

Extract  
the  
zip  
and  
use  
open  
website,  
run.  
The  
EXECUTE  
accepts  
an  
execute  
query  
which  
will  
be  
used  
with  
a  
transaction  
and  
rollback.

I  
already  
tried  
that  
(and  
forgot)  
but  
of  
course  
i  
can  
not  
have  
less.  
Iow,  
it  
should  
accept  
100%,  
maybe  
there  
is  
a  
know  
issue.  
But  
on  
inet  
i  
found  
very  
little.

To  
answer  
the  
responses  
so  
far:

This  
is  
an  
access  
MDB  
used  
in  
ASP.NET  
v2.0  
The  
website  
is  
hosted  
by  
a  
webhosting  
company,  
we  
only  
have  
access

Re: CREATE VIEW error

through  
ftp.

Yes,  
we  
have  
the  
project  
locally,  
i'm  
testing  
this  
create  
view  
stuff  
locally.  
The  
idea  
is  
that  
i  
need  
to  
write  
me  
complex  
queries,  
to  
complex  
for  
me  
unless  
i  
prepare  
multiple  
querydefs  
(views)  
using  
each  
other.

To  
avoid  
downloading  
the  
database  
for  
maintanance  
i  
wanted  
to

Re: CREATE VIEW error

Re: CREATE VIEW error

insert  
new  
queries  
remote.  
I'm  
just  
taking  
existing  
querydef's  
from  
the  
access  
database  
which  
work(!)  
and  
try  
to  
create  
them  
using  
Execute()  
stuff.  
'Simple'  
queries  
do  
get  
inserted,  
the  
example  
i  
shown  
does  
not..  
???

I  
simply  
use  
an  
ASPX  
having  
a  
textbox  
being  
passed  
to  
the  
execute  
command.  
Liek

Re: CREATE VIEW error

i  
said,  
it  
works  
until  
it's  
getting  
complicated  
according  
the  
error  
message  
i  
get.

Knoppert"  
<news@xxxxxxxxxx>  
schreef  
in  
bericht  
[news:446dbb14\\$0\\$2](mailto:news:446dbb14$0$2)

I  
have  
serious  
issue  
by  
inserting  
a  
query  
using  
(names  
are  
fake):

```
CREATE  
VIEW  
Query1  
AS  
SELECT  
Count(Table  
AS  
CountOfID,  
Day([Datum  
AS  
Dag,  
Month([Datu
```

Re: CREATE VIEW error

Re: CREATE VIEW error

```
AS
Maand,
Year([Datum
AS
Jaar
FROM
Table1
GROUP
BY
Day([Datum
Month([Datu
Year([Datum
Day([Datum
Month([Datu
Year([Datum
HAVING
(((Year([Dat
ORDER
BY
Year([Datum
DESC
,
Month([Datu
DESC
,
Day([Datum
DESC;
```

"Only  
simple  
SELECT  
queries  
are  
allowed  
in  
VIEWS."

Can  
this  
be  
solved?
