hi all,

I trying to connect remote sql server from my machine. but
it giving me some errors

Here are few errors listed,

§An error has occurred while establishing a connection to the
server.

When connecting to SQL Server 2005, this failure may be

RE: Error while connecting remote SQL server

caused by the fact that under the default settings SQL Server does not allow remote connections. (provider: Named Pipes Provider,error:40–Could not open connection to SQL Server))

§An error has occurred while establishing a connection to the server.

When connecting to SQL Server 2005, this failure may be caused by the fact that under the default settings SQL Server does not allow remote connections. (provider: SQL Network Interfaces, error: 26 – Error Locating Server/Instance Specified) (Microsoft SQL Server, Error: –1)

§A connection was successfully established with the server, but then an error occurred during the pre–login handshake. When connecting to SQL Server 2005, this failure may be caused by the fact that under the default settings SQL Server does not allow remote connections. (provider: Named Pipes Provider, error: 0 – No process is on the other end of the pipe.) (Microsoft SQL Server, Error: 233)

§A connection was successfully established with the server, but then an error occurred during the login process.(provider: Named Pipes Provider, error: 0 – No process is on the other end of the pipe.)

To solve this problem I did following changes in SQL server

§Enable the TCP/IP protocol using the Surface Area Configuration

Utility

§Make sure the TCP/IP protocol is enabled in the SQL Server

Configuration Utility

§start SQL Server browser

§Exceptions are added in Firewall

§Restart the computer

But still I am getting same errors.

Please give me some solution for this problem....

RE: Error while connecting remote SQL server

Thanks in advance.
