Hi all,

This is my problem...i am having two aspx pages.In the first page in Java Script side, i am creating a html table and the generated table is displayed in the same page..i want to display the created table in a Iframe (Html Code) which is in the other form..Kindly any one help me..

i am creating a table using this codes:

```
var tab="document.write("<Table>")" +
tab=tab + document.write("<tr>") +
..
..
..
tab=tab + document.write("</Table>") +
tab=tab + document.write("</tr>");
```

table is created successfully..

i also stored this html tags to a variable and passed to the other form..still not working..

sample:: window.open("url","MyTextBox")  
instead of this url i want to pass that variable

Thank u..

.
