Hello Dave

Generally, Login control's LoginButton will be represented by a `<input type="submit" />` or `<input type="image" .../>` html element according to its button type(normal or image button). However, in either case, it can display text only(or image only).

For your scenario, you want to display text over image, I think what you need is a button which has text property and with a background image which display the image in background. To do think you can use the css style to set the background image effect. e.g.

```
=====
<input type="submit" value="My Image BAcground Button"

style="font-size:20px;height:41px;width:258px;background-image:url(http://www.
asp.net/images/1.png)" />
=====
```

In Login Control, you may need to convert it to template based and customize the converted login button's aspx markup as you like. e.g.

```
=====
<asp:Login ID="Login1" runat="server"
HelpPageIconUrl="http://wcf.netfx3.com/Themes/default/images/sidebar\_title\_s
earch.gif"
HelpPageText="ddd" HelpPageUrl="Http://www.asp.net">
<LayoutTemplate>
<table border="0" cellpadding="1" cellspacing="0"
style="border-collapse: collapse">
<tr>
<td>
<table border="0" cellpadding="0">
<tr>
<td align="center" colspan="2">
Log In</td>
</tr>
<tr>

```

RE: Login control – image button with text over it

```
<td align="right">
<asp:Label ID="UserNameLabel"
runat="server" AssociatedControlID="UserName">User Name:</asp:Label></td>
<td>
<asp:TextBox ID="UserName"
runat="server"></asp:TextBox>
<asp:RequiredFieldValidator
ID="UserNameRequired" runat="server" ControlToValidate="UserName"
ErrorMessage="User Name is
required." ToolTip="User Name is required."
ValidationGroup="Login1">*</asp:RequiredFieldValidator>
</td>
</tr>
<tr>
<td align="right">
<asp:Label ID="PasswordLabel"
runat="server" AssociatedControlID="Password">Password:</asp:Label></td>
<td>
<asp:TextBox ID="Password"
runat="server" TextMode="Password"></asp:TextBox>
<asp:RequiredFieldValidator
ID="PasswordRequired" runat="server" ControlToValidate="Password"
ErrorMessage="Password is
required." ToolTip="Password is required."
ValidationGroup="Login1">*</asp:RequiredFieldValidator>
</td>
</tr>
<tr>
<td colspan="2">
<asp:CheckBox ID="RememberMe"
runat="server" Text="Remember me next time." />
</td>
</tr>
<tr>
<td align="center" colspan="2"
style="color: red">
<asp:Literal ID="FailureText"
runat="server" EnableViewState="False"></asp:Literal>
</td>
</tr>
<tr>
<td align="right" colspan="2">
<asp:Button ID="LoginButton"
runat="server"
CommandName="Login" Text="Log In"
ValidationGroup="Login1"
style="background-image:url(http://msdn2.microsoft.com/msdn/Controls/MTPS_Ba
nnerCtrl/en-us/msdn.jpg)" Height="28px" Width="96px" />
</td>
</tr>
</tr>
```

RE: Login control – image button with text over it

RE: Login control – image button with text over it

```
<td colspan="2">  
<asp:HyperLink ID="HelpLink" runat="server"  
NavigateUrl="Http://www.asp.net>ddd</asp:HyperLink>  
</td>  
</tr>  
</table>  
</td>  
</tr>  
</table>  
</LayoutTemplate>
```

</asp:Login>

=====

Hope this helps.

Sincerely,

Steven Cheng
