Is there anyone who can help me with this.??  
I am getting frustrated with this problem.

I added few lines of code in web.config:

```
<system.net>  
<defaultProxy>  
<proxy  
usesystemdefault = "false"  
bypassonlocal="false"  
proxyaddress="http://address:port"/>  
</defaultProxy>  
</system.net>
```

The error changed to:  
"The request failed with HTTP status 404: Not Found. "

Please help!! Is it the security ?

Thanks  
Cris

.
