Hi Ben,

Any progress on this? If there is anything else we can help, please feel free to post here.

Sincerely,

Steven Cheng

Thanks for your reply Ben,

Yes, the 3rd question is also what I have mentioned in last reply. Currently it seems ASP.NET webservice handler has done the http GET/POST test page rendering itself and doesn't provide any means to customize it. I've met some one encountering the same problem before. So far what we

can

get is using a custom test page to invoke the webservice via http

RE: Web service test page uses internal port

GET/POST.

You will also need to replace the test page link in the WSDL document display page.

Sincerely,

Steven Cheng
