Hi Marshal

Thanks for your reply. To clarify, in my code I have this:

```
void Page_Load(Object Sender, EventArgs e)
{
    if ( Request.IsSecureConnection )
    {
        // do stuff
        // never gets here
    }
    else if ( Request.ServerVariables["HTTPS"].ToLower() == "on" )
    {
        // do stuff
        // gets here OK !!
    }
}
```

So in the same Page_Load function how can Request.IsSecureConnection be false, yet Request.ServerVariables["HTTPS"].ToLower() be "on"

????

Thanks again

Rob
