I am new to .NET and have been experimenting with ASP.NET and webservices. I have written a small app with just two simple webservices (Hello world-esq) but, when I run the app I get this message on the web server. The app seems to run fine but, I would still like to understand the error.

Aspnet_wp.exe – Application Error

The instruction at "0xâ€!â€!â€!" referenced memory at "0x0â€!â€!". The memory could not be "read"

Any help would be appreciated.

Thanks.
