Thanks but that wont do it. I need the text to gradually change from one black to red over a period of time, pause a few seconds, and the gradually change back again. Here's a lame attempt I made at doing this which should give you an idea of what I'm trying to do, but it doesn't work too good.

also, do you have any good ideas on how to iterate through different shades of a color? What I did below seems to be a lot of code for this effect.

Thanks.
