Kevin,

Thank you that worked.

Are there any ASP.Net references that you could recommend? I'm new to ASP.Net (but not C#), and I find my current resources lacking. Especially when I use a MS example from their help (this <body> tag issue), and, correct me if I am wrong, I see no mention on that help page of adding the HTMLGenericControl to my aspx.cs page.

Thanks again for your time.
