Hi Arthur,

>From your description, you can't get a *TextBox's* new inputed values in a Button's Click event. I'm not sure on your complete page content and code behind file but I don't think this will be a big problem. Maybe we just miss somethings in the codebehind or ... I've attached a simple test page in this message, you can have a try on your side to verify whether there is anything different in your page.

If you have any other questions, please feel free to let me know. Thanks.

Regards,

Steven Cheng
