By default ASP.NET runs under the ASPNET account.
Make sure this user account has read/write permissions to the MDB file.

Alternately you could use impersonation to have ASP.NET run under a different account that has the necessary permissions.

Here's more info on impersonation:

<http://msdn.microsoft.com/library/default.asp?url=/library/en-us/cpguide/html/cpconaspnetimpersonation.asp>

--

I hope this helps,
