hi is there a way to bind a menu control with a dataset without get this error?

System.InvalidOperationException: HierarchicalDataBoundControl only accepts data sources that implement IHierarchicalDataSource or IHierarchicalEnumerable.

I've tried this , but it doesn't render correctly and write the menu with some extra elements

```
Dim x As New XmlDataSource
x.DataFile = Master.serverMapPath + "app_data/level2Menu.xml"
```

```
Menu1.DataSource = x
Menu1.DataBind()
```

.
