Thanks for the reply.

I've got the default ContentPlaceHolder provided, into which I've put a couple of images and a horizontal rule,

Here's the source:

```
<% @ Master Language="VB" CodeFile="MasterPage.master.vb"
Inherits="MasterPage" %>

<!DOCTYPE html PUBLIC "-//W3C//DTD XHTML 1.0 Transitional//EN"
"http://www.w3.org/TR/xhtml1/DTD/xhtml1-transitional.dtd">

<html xmlns="http://www.w3.org/1999/xhtml >
<head runat="server">
<title>Master Page</title>
</head>
<body>
<form id="form1" runat="server">
<div>
<asp:contentplaceholder id="ContentPlaceholder1" runat="server">

<br />
<hr />
</asp:contentplaceholder>
</div>
</form>
</body>
</html>
```

Have you got a ContentPlaceHolder control in your master page?

"Andrew Kidd" wrote:

Hi,

I've just been working through several examples of how to create Master pages and then create content pages which are linked, but I cannot see the Master page when I'm viewing the content page in "Design", nor do I see it when I'm viewing the page in the browser.

I'm adding the Master page through the Add New Item dialog, and creating Web Forms with the "Select Master Page" option checked, then selecting the Master page from the subsequent dialog.

I've tried the web application both using the VS 2005 built-in webserver and my local IIS ... but nothing seems to work.

Is there anything obvious that I'm doing wrong?

Thanks in advance

PS Running Windows XP Pro on my laptop and here's a dump from the VS about box ...
