it looks like you have default content in the Master Page,
If the Child Page have the contentId equal to your default contentId
it will replace the content in the default contentId,
so ContentPlaceHolder1 int your child page, be empty because there is
no content in the child content.

if you want to have the content share through out entire website.
bring the default content in the master page,
and put it out side of the contentplaceholder

Andrew Kidd wrote:

Thanks for the reply.

Here's the source:

```
<% @ Master Language="VB" CodeFile="MasterPage.master.vb"  
Inherits="MasterPage" %>  
  
<!DOCTYPE html PUBLIC "-//W3C//DTD XHTML 1.0 Transitional//EN"  
"http://www.w3.org/TR/xhtml1/DTD/xhtml1-transitional.dtd">  
  
<html xmlns="http://www.w3.org/1999/xhtml >  
<head runat="server">  
<title>Master Page</title>  
</head>  
<body>  
<form id="form1" runat="server">  
<div>  
<asp:contentplaceholder id="ContentPlaceHolder1" runat="server">  
  
<br />  
<hr />  
</asp:contentplaceholder>  
</div>  
</form>  
</body>  
</html>
```
