the complete description of my problem is as follows:-

i have a databound listbox id "listboxcity" that has a multiple selection made to true. when user select multiple values in listbox and clicks button i want them to show the results in the datagrid id "datagridname" on the same page using panels.

```
<script runat="server">
SqlConnection conn = new SqlConnection("user id=sa;password=;Initial
Catalog=jobsdb;Data Source=localhost;Integrated Security=SSPI;");
protected void Page_Load(object sender, EventArgs e)
{
SqlCommand sqlcity = new SqlCommand("Select * from tbl_city",
conn);

conn.Open();
SqlDataReader citydr;

citydr = sqlcity.ExecuteReader();
listboxcity.DataSource = citydr;
listboxcity.DataBind();
citydr.Close();
}

protected void Button1_Click(object sender, EventArgs e)
{
Panel1.Visible = false;
Panel2.Visible = true;
String s = "select * from tbl_job where city_code=@city_code";
SqlDataAdapter sqlda = new SqlDataAdapter(s, conn);
sqlda.SelectCommand.Parameters.Add(new SqlParameter("@city_code",
SqlDbType.Int, 4));
sqlda.SelectCommand.Parameters["@city_code"].Value =
listboxcity.SelectedValue;
DataSet ds = new DataSet();
```

databounded listbox with datagrid results complete description

```
sqlda.Fill(ds, "tbl_job");  
datagridname.DataSource = ds.Tables["tbl_job"].DefaultView;  
datagridname.DataBind();  
}
```

till now it is working for single value selection and its successful code is given as above. Now how to make changes in it for multiple selection.

I have know the code that how to get multiple values from listbox by foreach loop structure e.g

```
int returnselectedvalues()  
{  
int values = "";  
foreach (ListItem li in listboxcity.Items)  
{  
if (li.Selected == true)  
{  
values += li.Value ;  
}  
}  
return values;  
}
```

and I think for this case SQL SELECT statement should be use with IN key word like e.g

```
USE Northwind  
SELECT CompanyName, Country  
FROM Suppliers  
WHERE Country IN ('Japan', 'Italy','USA','UK')
```

With all of this case I have put it up to you dears to solveout my problem.

.
