Thanks Walter.

The problem was in the skin file.

As I mentioned, I got the themes from a demo project via a download for an ASP.NET 2.0 upgrade book.

It contained a section for a WebPartZone with elements for various verbs (HelpVerb, CloseVerb, etc.) with a 'checked' property for each.

After tracking it down to that, I removed all the 'checked' properties and the controls now render properly in design view.

Hi AG,

Using the theme from

<http://www.binaryintellect.net/articles/displayarticle.aspx?id=4>,

styleSheetTheme works on my VS2005 at design time. If that works on your system too, I think this might be related to some specific configuration in

your project. Is it possible for you to create a reproducible project and post it here or send it to me? With a reproducible project, I might find the root cause or confirm this is a bug in VS2005 IDE. Thank you for your effort.

Sincerely,

Walter Wang (wawang@xxxxxxxxxxxxxxxxxxxxx, remove 'online.')

Re: Error Rendering Control

ications. If you are using Outlook Express, please make sure you clear the check box "Tools/Options/Read: Get 300 headers at a time" to see your reply promptly.

Note: The MSDN Managed Newsgroup support offering is for non-urgent issues where an initial response from the community or a Microsoft Support Engineer within 1 business day is acceptable. Please note that each follow up response may take approximately 2 business days as the support professional working with you may need further investigation to reach the most efficient resolution. The offering is not appropriate for situations that require urgent, real-time or phone-based interactions or complex project analysis and dump analysis issues. Issues of this nature are best handled working with a dedicated Microsoft Support Engineer by contacting Microsoft Customer Support Services (CSS) at <http://msdn.microsoft.com/subscriptions/support/default.aspx>.
