Make sure you have proper access to see those tables and then refresh the display in Visual Studio.

Can somebody help me please?!

I'm using MS Visual Studios 2005 and in the Server Explorer I can see the Oracle database but when I click on the tables link I don't see any tables and the "+" sign next to the tables link disappears. What is the reason for this? Is there some kind of magic that allows me to see the tables?

Thanks for your help.

Steve
