If you using Win2003 you must specifically add mdb file as a MIME type in IIS management console. I assume you are using MS Access for database.

George.

I have a need to allow an extrenal IT department to download 1 specific database. I have treid direct link and webclient methods but both get permission errors.

This type of page is not served.

Description: The type of page you have requested is not served because it has been explicitly forbidden.

Thank you in advance for your help.
