Actually, for Windows 2003, the account is DomainOrServer\NETWORK SERVICE.

What are you trying to write to that folder?

I think you need permissions for on of these 2

IUSR\_mahinename  
ASPNET

I moved web apps to Win2003.  
I have given read/write access rights to machinename/IIS\_WPG but still  
getting the error  
"Access to the path "c:\inetpub\wwwroot\myApp" is denied. "

Also gave machinename/IIS\_WPG rights to the folder myApp  
What i noticed is that the folder has Read Only attributes ticked if i right  
clicked myApp  
properties .  
Could this be the problem ?  
But i have tried turning off the read only.  
But when i go back and check the folder after turning it off the read only  
attribute stil remain  
ticked..  
Any ideas??
