Hi all,

Can any one help me to write a regular expression to validate the password entered on the text field in ASP.NET. The rules for the password are:

- 1- There must be at least one number in the password.
- 2- There must be upper and lower case letters in the password.
- 3- Password must begin with an alphabetic character.
- 4- Password cannot contain illegal characters, such as =, <, >, ;;, :, ' , " or comma (equal sign, greater sign, less than sign, semicolon, colon, single quote, double quotes, comma).
- 5- Password must be between 8 and 25 characters.

I'm not good at writing the expression. Please help me out.

Thanks in advance.

.
