Hi Gary,

You can have a look at the blog article from marss. Here are some other articles I've found mentioned some approaches create ajax stile uploading:

#Simple AJAX File Upload

<http://www.codeproject.com/KB/ajax/simpleajaxupload.aspx>

#Create An Ajax Style File Upload

<http://geekswithblogs.net/rashid/archive/2007/08/01/Create-An-Ajax-Style-File-Upload.aspx>

However, I still think directly put fileupload into updatepanel maybe problem prone since it is not designed to hold fileupload task(multi-part form data). Is there any particular requirement that you have to make file upload via ajax style?

Sincerely,

Steven Cheng

Is there any way to make an asp FileUpload control work within an UpdatePanel?  
Thanks,  
Garyh
