Thanks. It only happens when the window/tab is closed before the Ajax driven controls finish loading. Would take some time to make a project that duplicates it, separate from my current one (and I am afraid I have to keep that password protected due to sensitive data).

I am loading 11 drop down lists using the toolkit's Cascading Drop Down. If these have not finished loading and the tab is closed, then IE hangs up.

Any ideas?

Hi,

Do you mean if AJAX toolkit is used, sometimes when you close the browser the browser will hang? Could you send me a demo project that can reproduce this problem? My email is v-alchen@xxxxxxxxxxxxxxxx

| I have run into a situation that if a page/tab that uses the Ajax toolkit
| (using .net version 3.5) is closed before the Ajax enable controls
complete
| loading, then IE locks up. Does it in both IE7 and IE8. There is no
issue
| when the controls are allowed to complete loading.
|
| Can you please tell me the best practice that handles this?
|
| Thanks.
