I use this and it works just fine
here is the code

```
Dim PARAM1 As String
```

```
Dim PARAM2 As String
```

```
command.CommandText = "INSERT INTO ARACLAR (INDEXARC,ARCMARKA) VALUES(?,?)
```

```
PARAM1 = "00001"
```

```
PARAM2 = "ALFA ROMEO"
```

```
command.Parameters.Add("@INDEXARC", PARAM1)
```

```
command.Parameters.Add("@ARCMARKA", PARAM2)
```

```
command.prepare()
```

```
command.executenonquery()
```
