There is a fairly good list here of what is new in .NETCF v2.0.

<http://msdn.microsoft.com/netframework/programming/netcf/default.aspx?pull=/library/en-us/dnnetcomp/html/whats>

These can be considered a mixture of new features and changes addressing shortcomings in v1.0, technically v2.0 shouldn't be seen as addressing defects in v1.0 as that is what the service packs are for, but it all depends on your individual interpretation of a defect :-)

I've noticed that for v1.0 of CF.NET, all of the service packs included fairly detailed defect fix lists published. For example:

<http://www.microsoft.com/downloads/details.aspx?FamilyID=7bf313b9-71ed-4e15-ad6e-31>

Does such a document exist online somewhere, or is this all super secret information? :)

For a list of items **reported** on 2.0, look here:

<http://lab.msdn.microsoft.com/productfeedback/SearchResults.aspx?text=&stype=1&fields=1&type=0>
....and I would also encourage you to post any new things you have found as well.

Re: CF.NET 2.0 Defect Fix List?

I forgot to add ... but there is no list (AFAIK) that would show what items in CF2.0 address defects or shortcomings in CF 1.0.
