jijiji

Sorry guys, my problem is this, i've installed zebra's drivers on my handheld (symbol 9090, wince 5.0), the printer is bluetooth (zebra cameo2), i want to send to print a barcode or a text, but i dont know how to send it, i've read some post talking about sending by serial port because bluetoot uses a serial port, exactly what i want is a sample of how to send to print using c# if its possible, or should i use c++?
im using vs2005 cf2.0

Regards.
Rick.

Hi guys!

I have a problem with a zebra cameo2 bluetooth printer, somebody can help me please?
