I wouldn't say WM using the CF is easy and self explanatory, the platform is ever changing. There is every need for a good reference to the Dev handbook (WM) I posted.

I searched for Windows CE books and got a handful back – wasn't difficult:

<http://www.microsoft.com/mspress/companion/9780735624177/>
http://www.amazon.co.uk/Programming-Windows-CE-NET-Core-Reference/dp/0735618844/ref=sr_11_1?ie=UTF8
http://www.amazon.co.uk/Programming-Windows-Pro-Developer-Douglas-Boling/dp/0735614431/ref=sr_1_5?ie=UTF8
http://www.amazon.co.uk/Building-Powerful-Platforms-Windows-CE/dp/020161636X/ref=sr_1_4?ie=UTF8&s=books

Just to name a few...

Yes i can see that, its more towards WM CF.

I need a book in which Win CE platform specific development tasks are discussed, including Platform Builder, how to inject your application in the OS Image to be deployed on the device etc. Development in WM CF is pretty much straight foward and there is so much info online that you possibly dont need a book on that.

I was exploring Win CE tools when i realized that i need a book for myself and my team to grasp the environment and tools to deploy .net apps on CE.

This title

http://www.amazon.com/Programming-Microsoft-Windows-Third-Reference/dp/0735618844/ref=pd_sim_b
is all about eVC++ and merely has a chapter on .Net part.

I'm still looking for a good reference on developing for Win CE.Net.

Re: Need a good book on CE .Net Compact Framework

Thanks anyway.

I think Chris was referring to this book:

<http://www.amazon.com/Microsoft%20AE-Mobile-Development-Handbook-Wigley/dp/0735623>

I think the book above is targeted more to WM std and pro.

I think you'll be surprised how many people actually are using managed code now, very few I think are developing from scratch VC++ apps.

Thanks.

is this the title you referred:

<http://www.amazon.com/Microsoft-NET-Compact-Framework-Reference/dp/0735617252/r>

What i'm looking to do actually is to deploy Win.Net App on Embedded boards.

as the name suggests, Win CE.Net, there should be a significant weight behind

.Net part of it. but it doesn't seem to be the case. You tell me is this a

good idea to deploy .Net App on Win CE.Net? coz everyone else is doing VC++ on

it.

Thanks,

The MS Press book by Moth, Foot and Wiggley is a great reference. It's not CE 6.0 specific, but nothing that you'll find is (nor is there a market large enough to justify trying to write one).

Hi,

i want to deploy C# .Net application on Win CE.Net 6.0. The books i have seen yet are on app development wih VC++ for CE. I need reference of a good book / resources for application developement using .Net Compact Framework only for Win CE 6.0.

any help will be appreciated.

TIA
